Sr. Web Developer (Linux/Unix)

Growth, challenge, fast pace and unlimited opportunity………are you game?

Abacus Data Systems is looking for an experienced **Senior Web Developer** to implement internal system automation initiatives to further support our rapid growth. You will be a key member of the internal Automation Team responsible for architecting, implementing and maintaining company automation systems, process workflows and tools critical to the day to day operations of all company departments. This role offers variety and a chance to build and architect advanced and highly innovative solutions.

Job Functions:
- Work independently and as part of a small internal team to create and build out new and existing company automation functions.
- Work closely with CTO, project manager, automation testing and QA/QC team to understand, develop, implement and maintain interdepartmental automation workflow requirements.
- Work directly with internal department managers and stakeholders on automation initiatives.
- Act as a System administrator to existing and future Linux based automation VMs running various frontend/backend technologies.
- Provide development administration for company Web based ERP platform (Netsuite).
- Code and Debug web applications with emphasis on HTML5/CSS3, NoSQL, REST, JavaScript, RabbitMO and Netsuite: SuiteScript, SuiteTalk and SuiteFlow.
- Work within existing Agile development structure and systems to manage requirements, backlog, timing and documentation of all projects.
- Work with development, staging and productions systems to manage new/change feature deployments.
- Work with automation team members to brainstorm new ideas and features to increase efficiencies.
- Stay current on industry progression, standards and best practices.

Job Requirements:
- BS and/or Masters in Computer Science _or_ equivalent 3-5+ years' work experience.
- Solid and compliant HTML5/CSS3
- JavaScript and related libraries (jQuery, AngularJS, etc)
- Working/integrating with RESTful APIs
- Database familiarity including NoSQL (MongoDB) and traditional MySQL
- Working with and understanding the Netsuite web application development framework including SuiteScript, SuiteTalk and SuiteFlow.
- Server-side experience (node.js, PHP)
- Solid command of HTTP protocol and security measures
- Working with RabbitMO messaging brokering for inter-system processing

The Company:
Abacus Data Systems, Inc. (Abacus) provides single source, turn-key Legal Technology Solutions, from consulting services, to the design, deployment, implementation and management of local and virtual law office environments, leveraging cutting edge virtualization technologies. The company's 'Total Care' team provides US-based, high-touch services in support of their comprehensive suite of case management, time, billing and accounting systems, as well as their custom-tailored private cloud solutions. Founded in 1983 and backed by private investment, Abacus Data Systems is headquartered in La Jolla, California. We have doubled in size in the last year and will continue to grow at a rapid pace.

If you are looking for challenge, growth and opportunity to work on really cool stuff; please send your resume! If you qualify and you are interested, please forward me your latest resume version ASAP--subject line **"Sr. Web Developer."**
